

COBRACUT® TYPE G

For highest precision, even for steep taper cutting on AGIE-machines with toroid guide

The electrode **cobracut®** Type G has a highly wear-resistant special layer and is characterised by best parallelism with high work pieces. It fulfils the highest quality requirements, especially with the cutting of cones > 7°. Further features:

- EDM wire electrode with harder surface than **cobracut®** Type A
- Particularly suited for taper cutting on Agie machines with toroid guides
- Excellent cylindricities, particularly with higher workpieces on machines of the Evolution and Vertex series

Technical data

Core	CuZn36
Coating	Zn treated
Tensile strength	900 MPa / 130,000PSI
Elongation	1%
Color	Light-grey

Delivery program
